

A Message from the Program Directors

We are thrilled to share with you an opportunity to significantly impact the future of women's health care in our community. Marian Regional Medical Center's Obstetrics and Gynecology (OB/GYN) Residency Program is expanding our mission to provide comprehensive women's health care services to women of all ages in our local community. We are not merely physicians for pregnancy; we are physicians for women at every stage of life.

Since its inception in 2018, Marian's OB/GYN Residency Program has been a beacon of light and progress in our community and has flourished over the past four years. Today, we stand at a pivotal juncture in our program's journey, and we are ready to take the next significant step—the establishment of a standalone OB/GYN Residency Program Clinic.

Our vision for the OB/GYN Residency Program Clinic is not just a medical facility but a comprehensive health care hub that provides a wide array of services, including birthing education, postpartum and lactation support, perinatal mood disorder support, early parenting support, nutrition counseling, women's preventive care, acute and chronic management of gynecologic conditions, and more.

Our new 8,700-square-foot OB/GYN Residency Program Clinic will be operated by the Pacific Central Coast Health Centers, offering an ideal environment for our current and future residents to learn,

grow, and thrive. This clinic will also serve our diverse and medically vulnerable patient population by offering the services of translators in Spanish and Mixteco languages. However, to realize this vision, we need your support to cover the clinic's equipment needs and construction costs.

HERE'S WHERE YOUR SUPPORT BECOMES CRUCIAL:

- Patient Access
- Physical Space
- Simulation Training
- Clinical Innovation
- Improved Resident Education
- Patient Education

By supporting our OB/GYN Residency Program Clinic, you are investing in the future of women's health care in our community and helping to address a critical shortage of OB/GYN physicians in the Santa Maria Valley. Many resident physicians elect to practice where they trained; thus, the Residency Program Clinic is a key recruitment tool to increase the number of OB/GYNs for our community.

We invite you to join us on a remarkable journey that will shape the future of health care on the Central Coast by nurturing the next generation of skilled physicians. These future physician leaders will not only achieve their professional aspirations but will also play a pivotal role in

advancing our shared vision of delivering exceptional patient care.

We are deeply grateful to those who have already expressed their support for our OB/GYN Residency Program at Marian Regional Medical Center. Your commitment is the cornerstone of our success. To those contemplating involvement, we encourage you to consider the profound impact your support can make. Together, we have the extraordinary opportunity to make a lasting difference in the lives of countless individuals and to forge a legacy of excellence in health care for our community.

Warm regards,

Stephanie Lin
